EXPERIENCE

DABOTICS India Pvt. Ltd | Web Developer Intern

July-Sep 2023

- Developed distinct projects using HTML, CSS, Js and React.js during a three-month internship.
- Managed code using Git for version control, ensuring efficient collaboration within the team.
- Gained valuable experience in project management, teamwork and adaptability in a professional setting.

PROJECTS

Busy-Buy

- Developed "Busy Buy," a React-based e-commerce platform with dynamic routing, authentication, and Fire store integration.
- Received positive feedback from Coding Ninjas for its CRUD functionality and design, achieving a high score of 490/500.
- Implemented features including cart management, order processing, and user authentication to enhance user experience

iPod

- Developed an iPod interface using React.js, offering nostalgic user experience with smooth transitions and interactions.
- Features intuitive interface, responsive design for various devices, music playback controls, hierarchical menu navigation and versatile control options.
- Received acclaim for accurately mimicking the iconic design and functionality of the iPod interface, enhancing user engagement and satisfaction.

Photo folio

- Developed Photo Folio, a React-based photo album app for learning, enabling users to upload, organize, and share digital photos seamlessly.
- Implemented fundamental React concepts including Functional Components, States, Hooks, and Conditional Rendering to enhance user experience.
